Copilot Basic vs. M365 Copilot (Premium): What's the Difference?

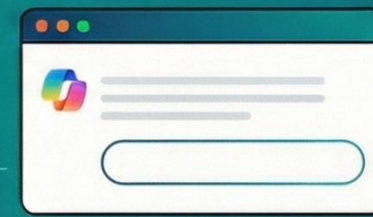

While both versions offer AI-powered assistance, Copilot Basic is a public web-based tool for personal use, whereas M365 Copilot (Premium) is an integrated enterprise solution that leverages internal organizational data with strict privacy controls.

Copilot Basic (Public & Personal)

PUBLIC WEB DATA &
REAL-TIME SEARCH

M365 Copilot (Premium - Enterprise & Integrated)

INTERNAL
MICROSOFT GRAPH
(EMAILS, FILES, CHATS)

Capability & Integration

Standalone Chat

Basic is a standalone interface:
Premium is deeply embedded within
Word, Excel, PowerPoint, and Teams.

External vs. Tenant Citations

Basic focuses on public URLs; Premium
tenant-specific data for business tasks.

Public Web vs. Internal Graph
Basic uses public web data; Premium grounds
in your internal Microsoft Graph emails and files.

Standalone Chat vs. App Integration

Basic is a standalone interface; Premium
within Word, Excel, PowerPoint, and Teams.

External vs. Tenant Citations

Premium prioritizes internal citations and
tenant-specific data for business tasks.

Public Web vs. Internal Graph
Premium grounds responses in your internal
Microsoft Graph emails and files.

Public Web vs. Internal Graph

Premium is deeply embedded within
Word, Excel, PowerPoint, and Teams.

Secure Document Vault

Premium grounds response in internal
Microsoft Graph emails and files.

Standalone Chat

Premium is deeply embedded within
Word, Excel, PowerPoint, and Teams.

External vs. Tenant Citations

Premium prioritizes internal citations and
tenant-specific data for business tasks.

Access & Data Privacy

Personal vs. Enterprise Licensing

Basic supports
personal Microsoft
accounts;

Premium requires specific
enterprise work/school
work/school licenses.

Premium requires specific
enterprise work/school
licenses.

Enterprise-Grade

Premium **does not use**
organizational data to train
foundational Large Language Models.

Enterprise-Grade Data Security

Feature	Copilot (Basic)	M365 Copilot (Premium)
Account Type	Personal (M5A)	Work / School Account
Model Training	Data may be used to improve models	Organizational data is NOT used for training
Primary Data Source	Public web & real-time search	Microsoft Graph (Emails, Files, Chats)

Voice in Microsoft 365 Copilot

Work with AI in the way that works best for you

Use to **brainstorm, catch up, or prepare** for meetings with voice based on your work and web data.

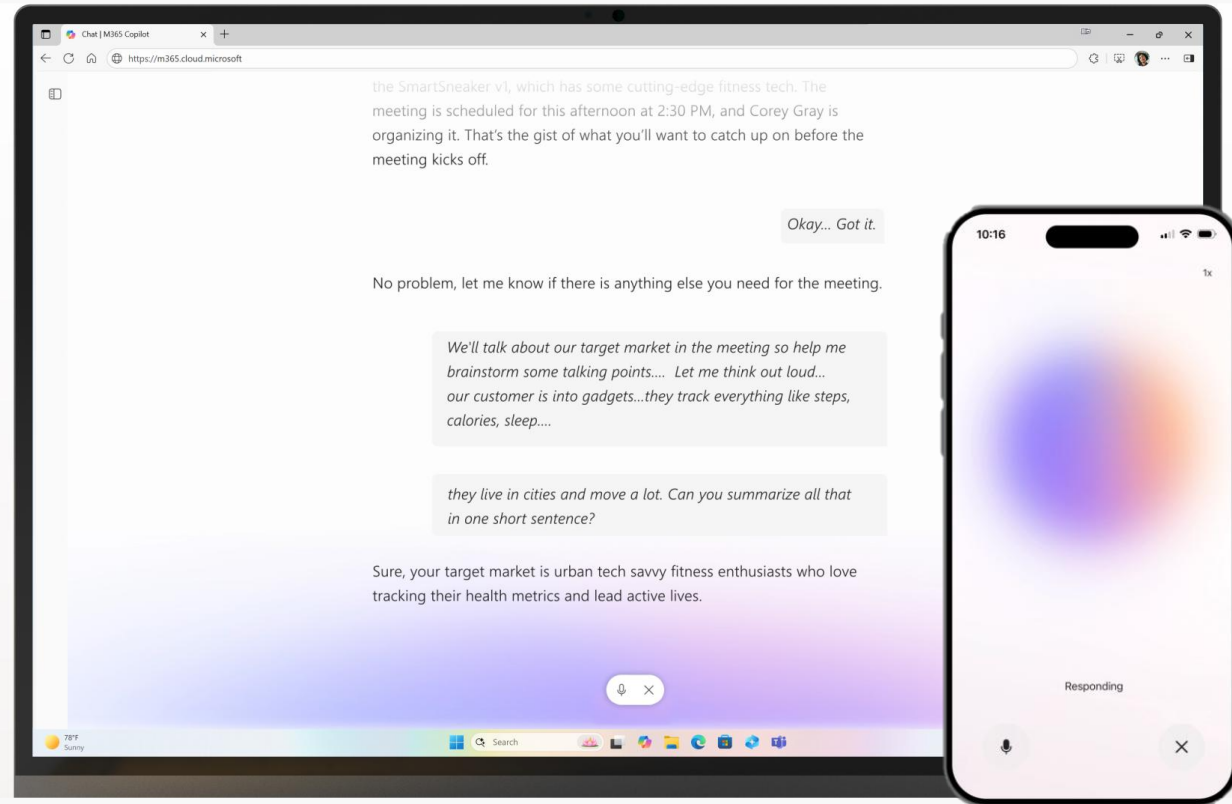

Speak and interrupt easily, whether on your mobile or at your desk by clicking "Start new voice chat" or just saying "**Hey Copilot**".

Switch between voice and text, **continue** previous chats, and tap into memory preferences.

Now coming to desktop, web and in the apps (Word, PowerPoint and Outlook mobile).

Voice on mobile in M365 Copilot Chat GA, voice on desktop and web, in M365 apps (Word, PowerPoint and Outlook mobile) and other features Q4 2025

Scheduled Prompts

Get ahead, regain context, or handle repetitive work

Get a **reminder email whenever** your scheduled prompt runs so you never miss a beat.

Available now

Let Copilot automatically schedule a prompt for you using natural language prompts like **“Send me a recap of my unread emails everyday at 5:00 PM”**.

Rolling out in Frontier in November 2025

Daily Morning Preparation Reminder at 9AM.

Work

Web

Help me prepare for my day every morning at 9 am

Copilot

Got it! I'll set up a recurring daily prep for you at 9:00 AM PT on weekdays starting tomorrow. It will include:

- Calendar overview for the day
- Top priorities
- Related emails and Teams messages
- Agenda items and Flagged tasks

Would you like me to include overdue tasks in your daily prep as well?

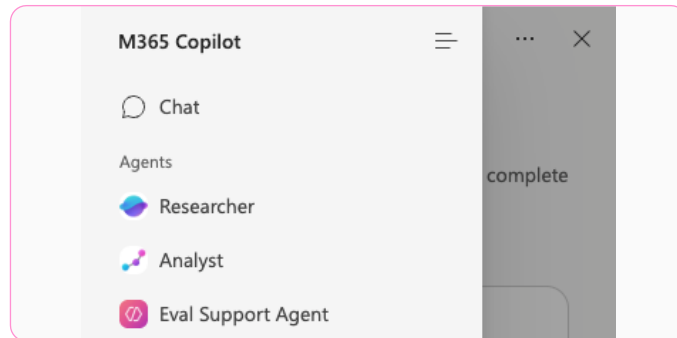

Your new agent workforce

Copilot extensibility in Apps highlights

1

Agents supported in Microsoft 365 apps

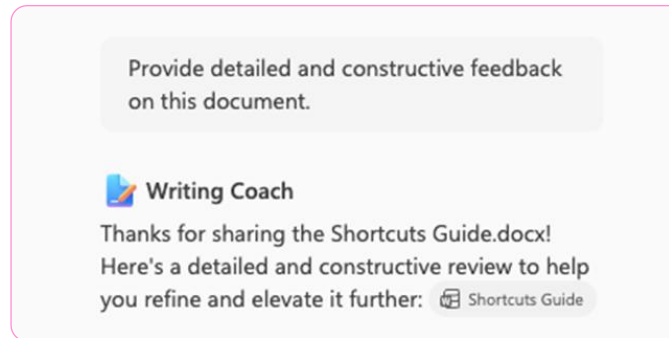

Declarative and custom engine agents: write once, run in Copilot Chat.

- Browse, install, and share agents without leaving the app via the Agent Store.
- Universal chat history across M365 apps.
- Skill parity with image generation, Code Interpreter, and adaptive cards across agents.

2

Context and creation for declarative agents

Agents create and edit documents with you as a thought partner.

- Agents use the open document and selection for answers with citations.
- Insert rich text and images from chat.
- Create new Word, Excel, and PowerPoint documents grounded on data from declarative agents.

3

Addin actions for agents enable vertical canvas skills

Provide deep integration between agents and WXP apps via Office JS.

- No switching between agents and addins.
- Custom app commanding in agents
- Run Office JS from Adaptive Cards for simple LOB experiences.

Word, Excel, and PowerPoint agents

Turn ideas into polished documents, spreadsheets, and presentations directly in chat

Works with you to clarify your request through targeted questions about focus, theme, audience, and file length.

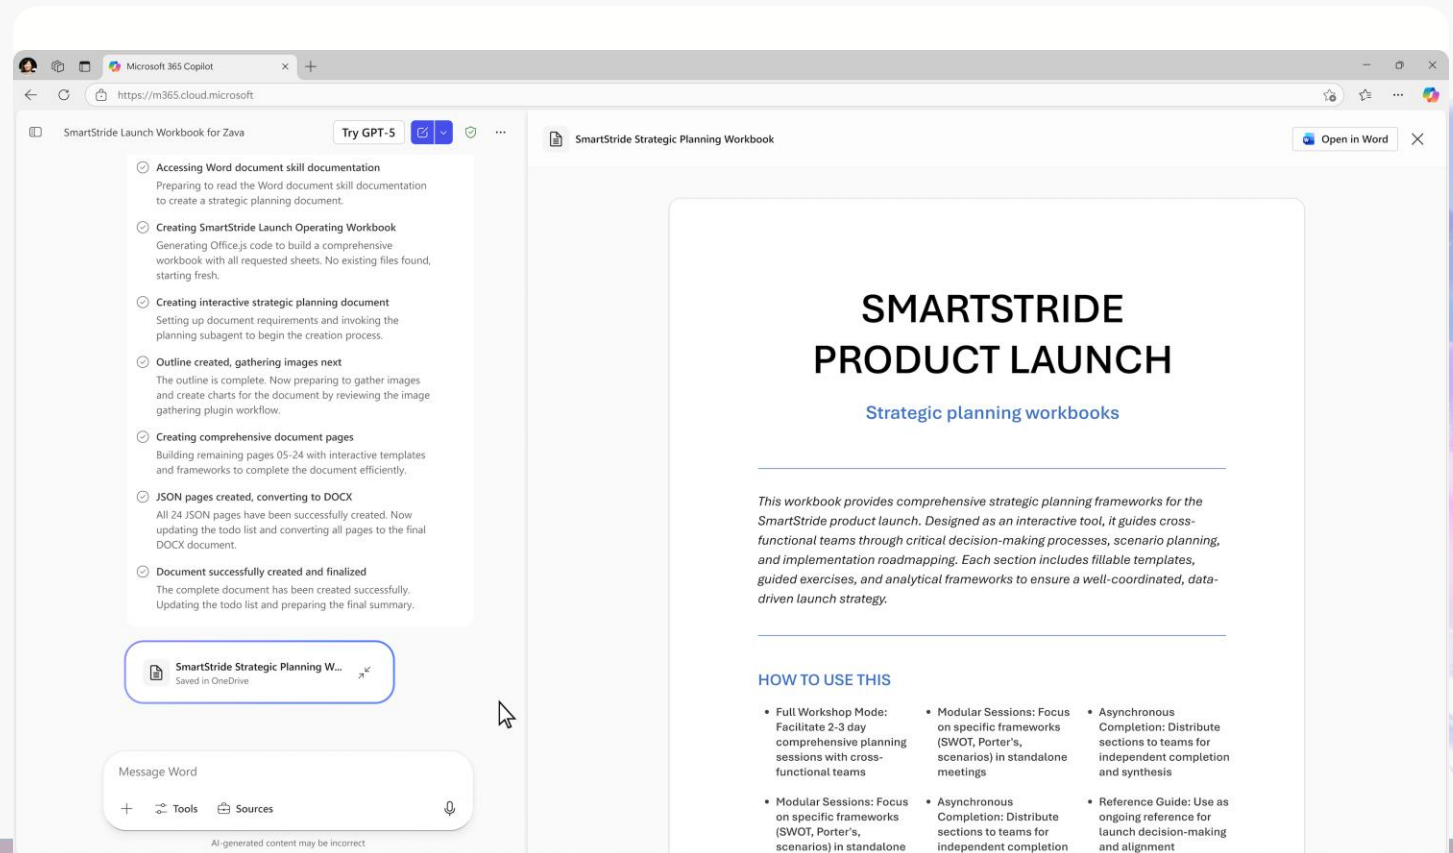

Draws from both web and work* sources to research, analyze and create high-quality content.

Let's you refine results in Chat or open in the Word, Excel, or PowerPoint apps to edit and collaborate further.

Rollout start to Frontier Program November 2025

*Excel Agent can currently only use web sources
